

Job Description

Job Code: #003_01

Role: Data Analyst/ Data Engineer (Internship)

Experience: (0-6 Months) Pursuing Graduation/ Post-Graduation (Internship experience preferred)

Duration: 6 Months Internship & Placement (post-assessment)

Location: Sector-48, Gurugram (On-site)

Qualification: Must be pursuing or have completed a B.Tech degree in Computer Science Engineering (CSE), with no backlogs.

About the Company:

Dream IT Consulting Services is a forward-looking IT consulting firm, headquartered in Gurugram. We specialize in Cloud Data Management, Advanced Data Analytics & Visualization, ERP/CRM implementation, RPA, as well as Digital Transformation & Custom Business Applications.

Founded in 2020, our mission is to deliver secure, scalable, and sustainable solutions built on deep domain expertise and cutting-edge technology.

Our core values are **Delight, Reliability, Expertise, Adaptability, and Motivation** — and we strive to make them a part of every engagement.

About the Role:

We are looking for a highly motivated and dynamic **Data Analyst (Intern)** to join our team. As part of our Recruitment Program, you will be part of our dynamic technology team, focusing on Cloud Data Management, Data Warehousing, Workflow Automation, and Advanced Data Visualization. You will gain hands-on experience in implementing innovative solutions that address real-world business challenges, under the guidance of experienced mentors.

Key Responsibilities:

1. Training & Learning:

- Participate in training sessions to build foundational knowledge in cloud technologies, data management, analytics and automation tools.
- Stay updated with the latest trends and advancements in the relevant technologies.

2. Project Participation:

- Assist in the design, development, and deployment of cloud-based data management and warehousing solutions using Microsoft Azure and Microsoft Fabric.
- Work with senior team members to automate business processes using Microsoft Power Automate.
- Support the development of custom business applications using Microsoft Power Apps.
- Collaborate on the creation of advanced data visualization dashboards using Microsoft Power BI.

3. Hands-On Experience:

- Engage in real-time projects that involve data profiling, processing, and management tasks.
- Assist in migrating data from on-premises environments to cloud-based enterprise data warehouses.
- Help identify and resolve data silos, security risks, and inefficiencies in existing processes.

4. Collaboration & Communication:

- Work closely with cross-functional teams to understand business requirements and deliver solutions that meet client expectations.
- Present findings and project progress to mentors and team leads.

5. Documentation:

- Document project learnings, code, and best practices for future reference.
- Contribute to creating user manuals and guides for the developed solutions.

6. Assessment & Feedback:

- Participate in regular assessments to evaluate your progress and areas for improvement.
- Incorporate feedback from mentors to refine skills and performance.

Eligibility Criteria

1. Educational Qualification:

- Must be pursuing or have completed a B.Tech degree in Computer Science Engineering (CSE), with no backlogs.

2. Academic Performance:

- Consistent academic performance with a minimum of 70% aggregate marks (or equivalent CGPA) throughout their academic career, including 10th, 12th, and B.Tech.
- Candidates with higher marks in Mathematics (through 10th/12th/ Graduation will be preferred).

3. Core Competencies:

- Strong understanding of fundamental concepts in Computer Science, including Data Structures, Algorithms, Database Management, and Operating Systems.
- Basic knowledge of cloud computing, data management, and software development lifecycle.

4. Technical Skills:

- Familiarity with programming languages such as Python, Java, or C++.
- Exposure to database technologies like SQL.
- Basic understanding or coursework in cloud platforms (e.g., Microsoft Azure) and data analytics tools.

5. Problem-Solving Ability:

- Demonstrated analytical and problem-solving skills through academic projects, internships, or coding competitions.

6. Soft Skills:

- Strong communication skills, both written and verbal.
- Ability to work collaboratively in a team environment.

7. Extracurricular Participation:

- Participation in coding challenges, hackathons, or relevant tech-related extracurricular activities will be considered an added advantage.

8. Internship Experience (Preferred):

- Any prior internship experience in related technologies or projects involving cloud computing, data management, or software development will be considered a plus.
